Why these results

- Scores are weighted by your slider settings and normalized to sum to 1.
- Unknown cost can be excluded (recommended) or penalized in scoring.
- Career preset keywords apply automatically unless you enter custom include keywords.
- Career/program keywords are soft-matched by default; enable strict filter only when needed.
- Career and safety use IPEDS proxies in this MVP (not direct placement/safety outcomes).
- Use this as a decision-support prototype, not a definitive ranking.
